

Unified Data. Limitless Insight.

Tessera is a clinical registry that unifies fragmented health data, making it easier to analyze and unlock actionable insights that improve frontline care, long-term decision-making and health outcomes.

Make Every Piece Count

We believe that data is key to improving patient outcomes, but many organizations lack the tools to unlock valuable insights. Custom-built clinical registries can be prohibitively expensive, while existing off-the-shelf solutions are often limited and designed primarily for clinical trials.

Tessera changes this by providing a cost-effective, purpose-built solution that allows organizations to turn data into actionable insights that drive healthcare innovation and improve patient care.

All your data, in one place

Tessera consolidates data from clinical systems, patient submissions and external sources into a single, decision-oriented view built for action, not just record-keeping. It supports evidence-based decision-making about access, quality, funding, performance and outcomes in ways that traditional EMRs are not designed to do.

Informed decisions, improved outcomes

Tessera's flexibility allows you to run reports and analyze data the way you want. This transforms data into actionable insights—driving smarter decisions, improved patient outcomes, and more meaningful research findings.

The Tessera Difference

Purpose Built.

Tessera is specifically designed to meet the needs of person-centric, condition-focused data collection.

Easy to Implement.

With pre-configured workflows and industry-standard Fast Healthcare Interoperable Resources (FHIR) data structures, Tessera can be deployed quickly and at a lower cost than custom-built solutions.

Direct Data Access.

Tessera offers full access to view, analyze and export your data with no vendor lock-in.

Clinical Data Interoperability.

Tessera uses FHIR and other nationally and internationally recognized standards for data design, allowing for easier integration with existing and future clinical systems.

External Partner Participation.

Patients and external partners can securely input data and access insights via their own designated interface.

Strong Foundation.

Built on stable, well-established cloud-based platforms, Tessera offers exceptional reliability, durability and scalability.

Enhanced Productivity.

Automated and AI-assisted data quality control, in-app help and natural language queries reduce reliance on data analysts for rudimentary tasks.

100% Canadian.

Tessera was designed in Canada specifically for Canadian organizations and all your data will be hosted on servers located in Canada.

A Proven Track Record

Tessera was created by TMS – the same team behind British Columbia's highly successful PRISM Clinical Registries platform. PRISM is used by over 1,400 health care professionals for 1.9 million unique patients, including organizations like Cardiac Services BC, BC Transplant, Trauma Services BC, Cystic Fibrosis Care BC, Stroke Services BC and more.

Benefits

Specialized functionality at an off-the-shelf price

Tessera is the only clinical registry solution that is both purpose-built and easy to implement. This allows for a quick, low-cost deployment without the need for expensive customizations or retrofits.

A futureproof investment

Tessera's FHIR interoperability, cloud-native architecture, AI integration and 100% Canadian hosting will allow it to grow and evolve with your organization's needs over time. It's a long-term solution that won't need to be replaced in ten years. Backed by our proven success with major healthcare organizations, Tessera ensures your investment is secure and adaptable for the future.

More integrations, more value

Tessera's team is highly experienced at setting up integrations with other platforms like Meditech, Health Gateway and Cerner that can unlock even more value.

Privacy, security and peace of mind

Tessera complies with all national privacy and data-sharing standards and hosts your data exclusively on servers located in Canada.

Customer-focused culture

You can rest easy knowing that the Tessera team is always available to provide timely assistance and support whenever you need it. Don't think of us as a service provider, think of us as a partner.
